Dear All,

Hi there I hope you're well,

I'm writing a report on the global investment capacity for operations and maintenance in global windpower...

I'd love your assistance with any existing data on capacity, future capacity, figures, research etc...

Especially useful would be your assistance in contacting your members, to ask for their data on future installations, costs, CMS, and various other relevant issues...

Ideally I could email you my data request sheet, which you might then pass on to your trade members, requesting their feedback...

We will of course feature all responding companies in the company listings in the final document...

I would hugely appreciate your assistance, based in the UK this is tough to achieve efficiently from over here...

I wonder if you might email me back suggesting a potential way forward? I am on a tight deadline here, so advice on how me might proceed at least in the first instance would be appreciated as soon as possible..

Many thanks!

Giles Crosse
